

# Industry pitch

One of the goals of the Annual Catalan Meeting on Computer Vision is to connect students from the Master's program in Computer Vision with AI professionals, Catalan computer vision community members, and potential employers. To facilitate these connections, we are hosting an Industry Pitch session featuring brief presentations from AI companies actively seeking new talent. Following the presentations, we'll have a networking coffee break, providing an opportunity to engage and interact.

Companies participating at ACMCV 2024 industry pitch:
