

# Organize your ICDAR2009 with C-LINK!

Heinz Kirchmann, Martin Memmel, Rafael Schirru

## C-LINK is a social sharing platform

- Access all conference papers and events
- Upload and share digital resources (papers, presentations, etc.)
- Tag, rate and comment on resources
- ...

## C-LINK is a social networking system

- Member search: find other attendees based on interests
- Send messages to other attendees
- Chat with other attendees
- Post on the whiteboard
- ...

## C-LINK is a recommender system

- Personalized recommendations of presentations
- Find similar users (intelligent profile matching)
- ...

## Technologies

C-LINK uses several technologies developed at DFKI:

ALOE (<http://aloe-project.de>) – the social resource and metadata hub. ALOE is an open platform that allows to introduce social media paradigms in existing (heterogeneous) infrastructures. ALOE combines traditional approaches to manage resources with user generated content.

DynaQ (<http://dynaq.opendfki.de>) – Dynamic desktop search for document based, personal information spaces. With DynaQ, users can browse and find emails, documents, blogs, and websites with innovative visualization paradigms.

myCBR (<http://mycbr-project.net>) is an integrated Case-Based Reasoning tool. It extends the Protégé ontology editor. myCBR is used for teaching CBR courses as well as for rapid prototyping in all sorts of projects.

## Acknowledgements

The development of C-LINK was funded by DFKI. The development of ALOE and DynaQ was partly funded by the Stiftung Rheinland-Pfalz für Innovation. We thank Simone Litterst and Oksana Schnabel for layout and CSS design, Malte Kiesel for chat integration, and Thomas Roth-Berghofer for myCBR support.

## For further information

Please contact [c-link@dfki.uni-kl.de](mailto:c-link@dfki.uni-kl.de). This flyer and more information on this and related projects can be obtained at <http://icdar09.dfki.uni-kl.de> and <http://www.dfki.de>.
